Drug brand names in Saudi Arabia

270 ingredients, grouped by class, with the brand names on the list for Saudi Arabia and the official Arabic spelling where the list has it.

How to read it. Bold: the ingredient in English. Under it: the top real brand names, with the Arabic spelling on the right, then the generic line (ingredient plus maker). A star marks a name that covers more than one product. Where no row is shown, the line says what was searched.
